

MULTIPURPOSE MEMBRANES

All membranes can be used for both heating and pressure systems.

Bag Type Membranes

DESCRIPTION

Membrane is one of the important part of expansion vessels and pressure tanks.

To ensure long life, we are handling all the processes including; CAD/CAM design, mould production, EPDM compound mixing, all laboratory tests of raw material and finished products in our own plants by our experienced engineers.

We apply highest level of quality controls before, during and after the production process to add value for the benefit of our customers.

Tailed Type Membranes

ADVANTAGES

- ➔ EPDM material
- ➔ Production according to EN 13831 and DIN 4807
- ➔ Suitable for drinking water according to Council of Europe Resolution AP (89)
- ➔ -10°C~+99°C working temperature
- ➔ Long life due to zero pre-charge loss in 10.000 cycles
- ➔ Wide range of products from 5 to 1500 liters

Double Volume Membranes

AVAILABLE FEATURES ON REQUEST

- ➔ Membranes in butyl
- ➔ Up to 130°C working temperature

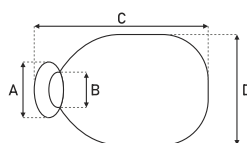

Extended Membranes

SUITABLE
FOR DRINKING
WATER
